

The 2012 Draft of DEQ-7 proposes that the category classification (toxic or carcinogenic) of 12 compounds be changed. The scientific information used to alter the categories is presented in the EPA Integrated Risk Information System (IRIS) at the following address:
www.epa.gov/ncea/iris/search_keyword.htm . Enter the CASRN number or the proper name and go to section IA1 and IIa of the summary toxicology review to determine the EPA classification of each compound and the scientific evidence used to arrive at this categorization.
